

## **2006 Spirit Award Recipient: Diane Watson, CCA, CIT**

### **Presented by President Linda Champlin-Frank**

Once again, the Spirit Award Committee had a hard decision to make with four deserving nominees received. After discussion, the choice was unanimous and I will now tell you a little about the winner.

This lady is a great asset to our organization. She always shows integrity in all she does and she cares very much about NAWIC and our chapter. She is always there to help out in any situation. We can always count on her.

With her own business and the field she is in, she is continually learning aspects of the construction industry. In continuing her education, she has also attained her CCA and CIT. She attends regional and national functions and the educational seminars presented at those events.

She is very loyal and always shows support of all fellow members. She is always available when needed, whether it be a NAWIC function or just as a friend to listen and help out with a problem and to give encouragement. She has helped our chapter accomplish local, regional and national recognition. She is truly an inspiration.

She is a Past President, was CAD Chair of our chapter for several years making it the success it is today, CAD Regional Chair last year and has taken on CAD National this year. She was responsible for creating the CAD problem the students will be working on and she will do the National judging. She is also our on-going Communications Chair maintaining our chapter award winning website, publishing The Centerline, our monthly chapter newsletter and she created and maintains the Region 8 website. This is dedication and while this takes a lot of her time, she still involves herself in any other projects our chapter participates in as time allows.

Thank you Diane Watson for all you do and I now would like to present you with the 2006 NAWIC Chapter 356 Spirit Award.
